Parts Inc.

# Press Release

## Printers Repair Parts Inc. acquires parts inventory from Townsend Industries, manufacturer of the T-51 Second Color Head.

Franklin Park, IL, September 27, 2010: Printers Repair Parts Inc. is proud to announce the acquisition of the complete parts inventory, blueprints, intellectual property, molds, fixtures, website, and customer list from Townsend Industries, manufacturer of the T-51 Second Color Head. For over fifty years, Townsend Industries has been manufacturing the T-51, commonly called T-Head, for the small offset press market, which includes AB Dick, ATF-Chief, Itek, Multilith, Ryobi, Toko/Proprint, Heidelberg TOK, GTO46 and GTO52.

Printers Repair Parts Inc. (PRP), one of the first independent press parts manufacturers, began selling their replacement parts for AB Dick, ATF-Chief, Davidson, Gestetner, and Multilith printing presses in 1970. Ever expanding, PRP moved into manufacturing parts for the Hamada, Itek, and Ryobi machines. In the early 1990's PRP entered into the Heidelberg sheetfed offset and Windmill letterpress parts line, and more recently is selling parts for Komori and Man Roland presses.

For forty years, PRP has been a leader and innovator in the replacement parts market, and continues to be at the forefront of their field. This acquisition is mutually beneficial for PRP's current and future customers, and the quality you have come to expect from Townsend Industries will continue for years to come. PRP would like to take this opportunity to thank you for your past business with Townsend Industries, and looks forward to supplying you with all your T-51, and offset press parts in the future. We invite you to stop by our booth #3854 at Graph Expo in Chicago, IL. October 3, 2010 through October 6, 2010. For more information contact: Ken Schelberger 847-288-9000 or email [ken@printersrepairparts.com](mailto:ken@printersrepairparts.com).
